Extraordinary Technology

ACUSON S3000 Ultrasound System,
HELX Evolution with Touch Control

Ultrasound – Designed by You.

If you could design your own ultrasound system, what would you do? We conducted over 170 usability sessions and spoke with 395 healthcare professionals* from around the world to find out what they wanted in an ultrasound system.

Their most common request: An intuitive and smart ultrasound system that enables healthcare providers to effectively manage today's demanding caseloads and diversity of clinical choices.

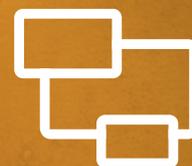

The ACUSON S3000™ ultrasound system, HELX™ Evolution with Touch Control was designed with a dedicated focus on General Imaging and Interventional Radiology. It offers new levels of workflow efficiency, imaging performance and sustainability.

Workflow

Increase process efficiency and patient throughput with intuitive workflow innovations

Imaging Performance

Strengthen clinical capabilities with enhanced imaging technologies that advance diagnostic clarity

Sustainability

Investment protection with an upgradeable ultrasound architecture that addresses evolving needs

Workflow

Efficient Workflow – Designed for You.

Increase your process efficiency and patient throughput with intuitive workflow innovations offered by the ACUSON S3000 system, HELX Evolution with Touch Control.

Powered by an intuitive, user-centric interface, the system promotes streamlined exam flows to improve exam quality with less effort. Its new usability concept helps to eliminate unnecessary keystrokes and repetitive hand movements providing a whole new level of user performance.

Intuitive Touch Display

- 12.1-inch (30.7 cm) high-resolution display with Instant Response technology allows for precise key selections
- Tab folder browsing improves walk-up usability by eliminating hidden menus and swipe searching

Simplified Control Panel

- Fewer keys and a simplified home-base control structure help to optimize exam workflows and reduce training time
- Laser-optical trackball promotes sensitivity and accuracy in measurements and helps reduce repetitive stress injuries
- Digital and tactile keyboards increase flexibility for different user preferences and workflow situations

44%
fewer soft keys*

33%
fewer tactile keys*

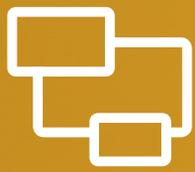

22%
fewer home-base keys*

Workflow Innovations

- Context-sensitive body markers feature intuitive pictograms, transducer markers and supportive protocols
- Smart-swap annotations with color-coded guidance simplify annotations by suggesting logical replacement text specific to the exam being performed
- Directly access and control eSieScan™ workflow protocols through the touch display

* Compared to ACUSON S Family, Classic release.

Imaging Performance

The Future of Imaging – Available to You.

Expand Clinical Insights with Multi-modality Imaging

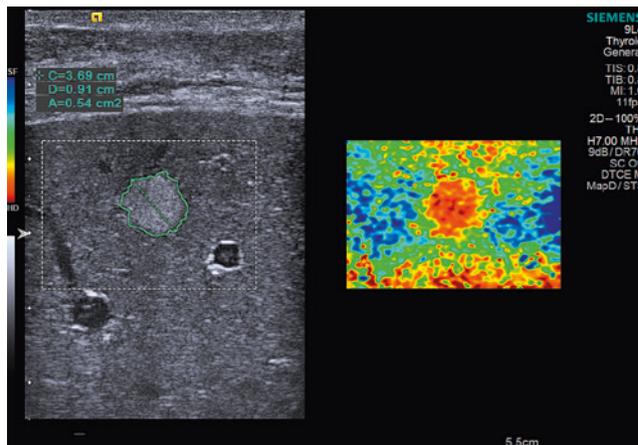

- 3D topography of CT and MR combined with real-time ultrasound
- Unparalleled depth of clinical and spatial information for interventional procedures and complex ultrasound analysis
- Smart initialization and auto-alignment to help reduce examination time and effort

Reduce the cost of care and potential radiation exposure for patients by fusing MRI or CT images with real-time ultrasound for lesion follow-up and management in interventional procedures.

Evaluate Tissue Stiffness with Shear Wave Elastography

- Based on Acoustic Radiation Force Impulse (ARFI) imaging, Siemens' unique Virtual Touch™ technologies provide a new dimension of ultrasound information
- Qualitative imaging or quantitative shear wave tissue measurements across multiple transducers and study types

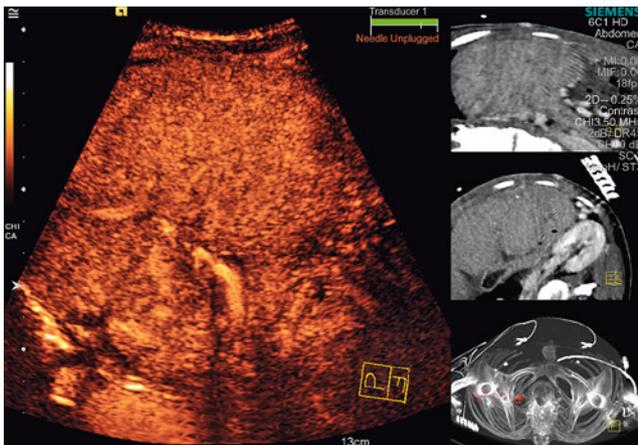

Evaluate stiffness of liver lesions for improved diagnostic confidence while potentially reducing unnecessary biopsies.

Experience In-depth Anatomy Visualization with Contrast Enhanced Ultrasound* (CEUS)

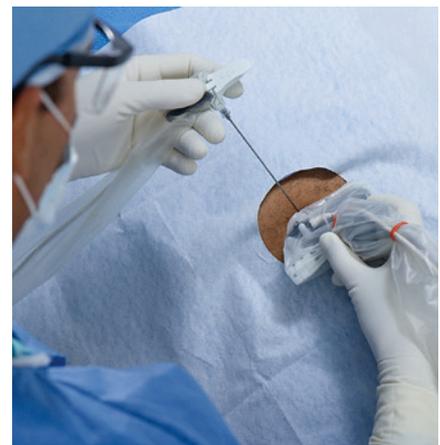

- Designed for visualization of lesions in organs based upon vascularity and micro-bubble visualization
- Cadence™ Contrast Harmonic Imaging* (CHI) for the visualization of stunning detail
- Cadence™ Contrast Pulse Sequencing* (CPS) for penetrating clarity

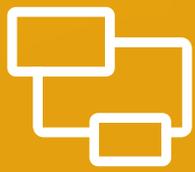

Improved near-field and detail resolution in liver tissue analysis, as demonstrated in this liver cirrhosis using Cadence CHI in combination with eSieFusion™ imaging.

Reduce Risk Associated with Biopsies and Ablation Procedures

- eSieGuide needle tracking allows clear needle visualization
- 3D markers help align lesion to needle orientation
- Reduce potential expenditures from complications

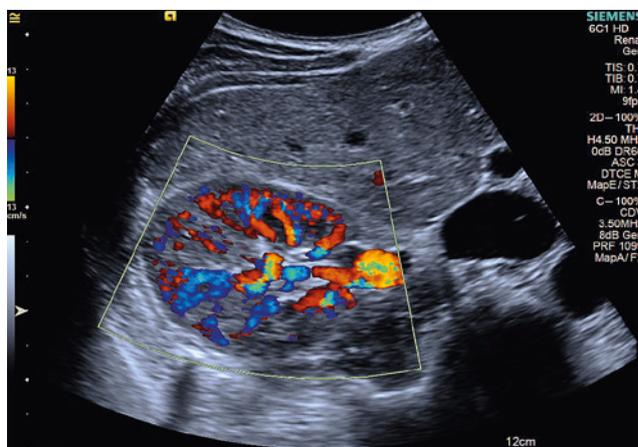

*At the time of publication, the U.S. Food and Drug Administration has cleared ultrasound contrast agents only for use in LVO. Check the current regulation for the country in which you are using this system for contrast agent clearance.

Imaging Performance

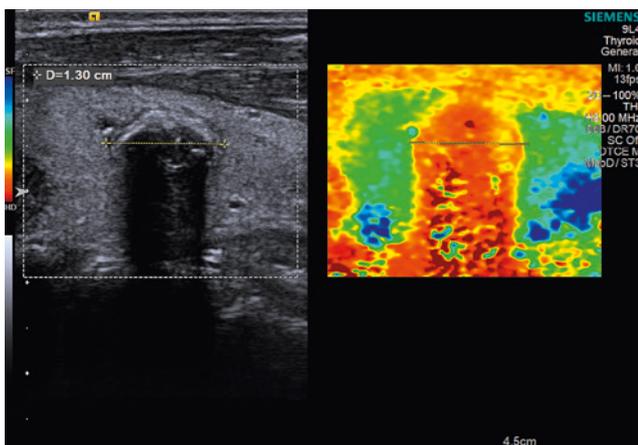

Beautiful Images – Acquired by You.

The unique signal processing algorithm of the SieStream™ HD architecture works to produce the highest signal fidelity. It optimizes signal integration between transducer and display by doubling the standard pixel density. The result: beautiful images that provide you with the highest diagnostic confidence.

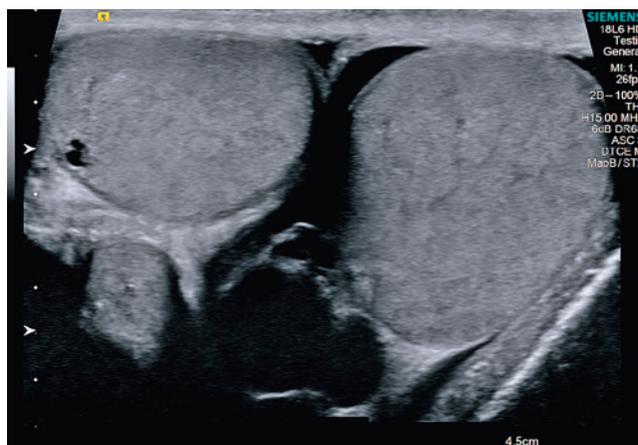

Superb color Doppler sensitivity in renal perfusion with the 6C1 HD transducer.

General Imaging

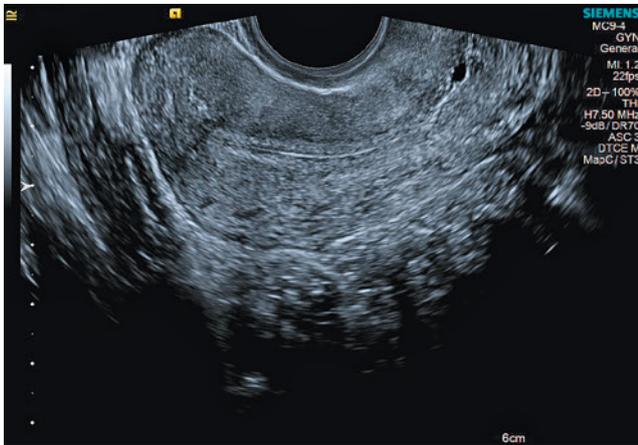

Evaluate lesion stiffness and visualize improved border detection and detail resolution, such as in this thyroid nodule using Virtual Touch™ imaging.

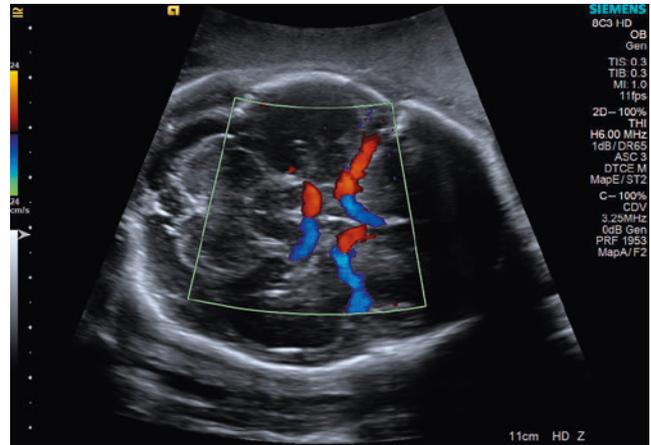

Visualize more with the wide field-of-view and increased far-field image width of the 18L6 HD transducer and Virtual Format imaging.

OB/GYN

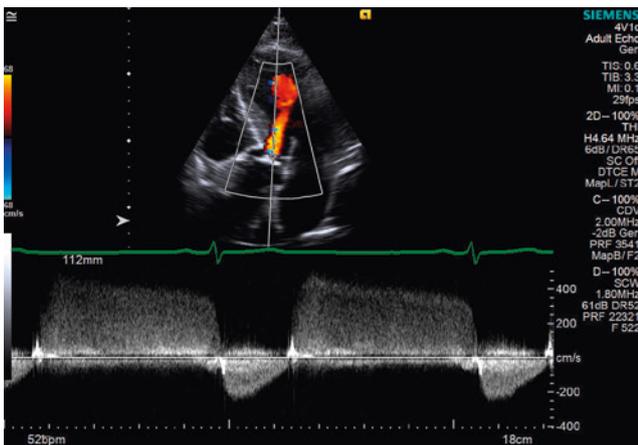

Continuous frame-by-frame image optimization with eSielimage™ multiparametric optimization; balance gain, reduce noise and improve image quality in the uterus with the MC9-4 transducer.

Visualize exquisite detail and contrast resolution of the third trimester fetal brain with the 8C3 HD transducer.

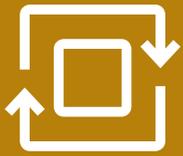

Cardiovascular/Vascular

Excellent color Doppler spatial sensitivity for improved diagnostic confidence in aortic insufficiency.

Remove artifact and enhance borders, such as in this carotid artery with intimal thickening and complex plaque formations using Clarify™ vascular enhancement (VE) technology.

Sustainability

Investment Protection – Customizable for You.

The ACUSON S3000 system, HELX Evolution with Touch Control is designed to adapt to your standard of care. From usability to technical compliance standards, Siemens has worked to ensure that the system you invest in today will be up-to-date and ready to integrate the most advanced technologies for years to come. This allows you to manage your costs without compromising your quality of care.

Advanced Technologies Included

- Advanced SieClear™ spatial compounding
- Clarify™ vascular enhancement (VE) technology
- SieScape™ panoramic imaging
- eSiImage™ multiparametric optimization
- Multi-modality review
- Data transfer to Nuance® Powerscribe 360
- Wireless DICOM reporting

Comprehensive Service Packages

- Siemens Performance Plans for optimal system performance
- ASCEND* upgrades for maximum investment protection
- Ultrasound Evolve* software updates to enhance productivity
- Siemens Remote Service™ for fast diagnosis and software delivery
- Ultrasound System Security to deliver confidence and compliance

Microsoft® Windows® 7 Integration

- Improved network security and system stability
- Enhanced compatibility with electronic medical systems
- Scalable for the future

*Due to regulatory reasons, future availability cannot be guaranteed.

Standalone clinical images may have been cropped to better visualize pathology.
